DATE MAILED: 02/25/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

LD

Office Action Summary	Application No. 10/673,406	Applicant(s) LIU ET AL.	
	Examiner David Buttner	Art Unit 1712	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-7 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-7 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1712

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 3 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claimed stabilizer cannot be found in the prior art. The specification gives no guidance how to make this stabilizer.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1's "provides with" is not understood.

The structure of claim 3's stabilizer cannot be determined. Applicant should provide a structure for this compound in the remarks of the next response.

Claim 5's "plastic antioxidant" is not understood. Antioxidants are normally low molecular weight compounds. Therefore, antioxidants are not normally considered "plastic".

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1712

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2 and 4-6 rejected under 35 U.S.C. 103(a) as being unpatentable over Chung 2002/0115762 in view of Sakashita '801 or Calkins '288 or Calkins '706.

Chung exemplifies (table 1) blends of polycarbonate, titanium dioxide, a stilbene derivative etc. The stilbene derivative is believed to correspond to applicant's brightener. The stilbene derivative can be used in amounts of 0-1 parts (paragraph 44). In addition, stabilizers, antioxidants and dyes can be included (paragraph 45). Chung does not give amounts for the stabilizers.

Sakashita (col 11 line 55), Calkins '288 (col 1 line 41) and Calkins '706 (col 1 line 60) each provide typical amounts of stabilizer when used in polycarbonate compositions. It would have been obvious to employ the stabilizers in Chung in the typical amounts known to those of ordinary skill.

Claims 1,2 and 4-6 rejected under 35 U.S.C. 103(a) as being unpatentable over Barren '360 in view of J2002003710 or J2002284978.

Barren exemplifies (table 1) blends of polycarbonate, stabilizers, titanium dioxide and other materials. In addition, optical brighteners, dyes (col 13 line 7), and antioxidants (col 12 line 46) can be included. Barren does not give amounts of brightener.

The two secondary references teach brighteners can be used in polycarbonate compositions in amounts up to 1%. It would have been obvious to use the brighteners in Barren in amounts of up to 1%.

Claims 1 and 4-7 rejected under 35 U.S.C. 103(a) as being unpatentable over J2002019065 in view of J2002003710.

J2002019065 exemplifies blends of polycarbonate, titanium dioxide, Uvitex OB (a brightener), high density polyethylene and other additives. Stabilizers such as UV absorbers and antioxidants can be included (paragraph19). The reference does not specify the acceptable range of brightener amounts.

J2002003710 suggests brighteners such as Uvitex OB can be used in polycarbonate compositions in amounts up to 1%. Also, J2002003710 suggests UV stabilizers in amounts of 0.05-2%. It would have been obvious to include up to 1% brightener in the J2002019065 for the expected advantages.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Buttner whose telephone number is 571-272-1084. The examiner can normally be reached on weekdays from 10 to 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski, can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should
